

complaint, and plaintiff desired to continue the speculation, his further remedy was to re-purchase the loss stock himself and charge defendant with the loss reasonably sustained in doing so. "The advance in the market price of the stock," says Judge Rapallo, "from the time of the sale up to a reasonable time to replace it after the plaintiff received notice of the sale, would afford a complete indemnity."

The Canada Southern Railway Company have issued to their bondholders the following circular:

NEW YORK, Dec. 26, 1873.

To the Bondholders: Owing to the financial difficulties growing out of the late panic, whereby a large amount of the funds of this company became tied up, and, though secure, are not available for the payment of interest, we are suspending the securities which are sufficient, as a fair valuation, to meet all the obligations of the company, it becomes necessary to ask the bondholders to fund in a new bond, having three years to run from Jan. 1, 1874, and to mature on July 1, 1874, and Jan. 1, 1875, from each of the Company's First Mortgage bonds; to exchange to be made by the Union Trust Company of New York, who will hold in trust the interest on these bonds until the principal is paid, thereby giving the bondholder all his original security in case of non-payment of the interest bond. The interest on the registered bonds will be arranged in a similar manner, while such values as are reliable will be paid to the former of the bonds.

You will observe that the new bond bears interest from Jan. 1, 1874, although it includes the payment of a coupon due July, 1874, and one due January, 1875, thus offering an intermediate period of six months.

The above is unfortunate at a time of general prostration in business. The managers have no reason to change their views heretofore entertained as to the success and ultimate value of the project.

For the benefit of the securities of the Company at this time could only be done at a enormous sacrifice, which would still further embarrass the Company and paralyze its operations. Funding the interest as proposed will not only secure the payment of our assets and earnings, will enable it to meet its maturing obligations without sacrifice to the Company, and to efficiently work the railway and develop the traffic, and is believed to be the best interest of all concerned.

For full information see the office of the Company in the City of New York, and for the funding of interest to the Union Trust Company, No. 72 Broadway, New York. By order of the Board of Directors.

M. COUGHTON, President.

THE RATE OF INTEREST FOR MONEY is always an important subject to both borrower and lender. An able and suggestive essay on this topic by Prof. E. R. Elliott of the Treasury Department, read at the Portland Scientific Meeting, is reported fully in TRIBUNE LECTURE EXTRA NO. 10. Price 10 cents. Address THE TRIBUNE, NEW-YORK.
